

Fuel Right® Bench Test Fuel Right 15K

Objective: to demonstrate Fuel Right's ability to clarify diesel fuel

1. Diesel fuel sample on right contaminated with sludge was treated with 3 drops of 15K

2. 24 hour results – right jar showing evidence of clarifying

3. After 7 days, fuel is clear with sludge settled at the bottom.

4. After 14 days, fuel is showing consistent improvement in clarity from day 7 results. Bottle on left showing natural settlement of sludge.

5. After 21 days, sludge settled on the bottom is starting to disappear. Bottle on left showing natural settlement of sludge.
